

Essential Computing 1

Binary

Int to binary

How it works:

<https://indepth.dev/the-simple-math-behind-decimal-binary-conversion-algorithms/>

```
void displayBinary( int value ){  
    if( value > 0 ){  
        displayBinary( value / 2 );  
        System.out.print( value % 2 );  
    }  
}
```
