

## Micro Assignment

# Late for school

Create a program that evaluates whether you are legibly late for school. The program asks if a number of conditions are correct and evaluates using a single if-statement where conditions are combined using logical operators. Only if the conditions are answered in a specific way, you are legibly late.

- Store input into boolean variables using `scanner.nextBoolean()`.
- Use a single if-statement with logical operators.

Did your cat die? (true or false )

true

Was the train cancelled? (true or false )

true

You put shoes before pants? (true or false )

false

You are legibly late.
