

Micro Assignment

Riddler

Create a program that presents a riddle, receives an answer and gives feedback.

- Use Scanner to receive text input.
- Compare strings using the equals method.
- Define and call a method that takes a string as argument, combines it with "Riddler says" and prints it out.

Riddler says: I have four legs and I don't talk. What am I?

dog

Riddler says: That is false. The answer is chair.
