

Micro Assignment

# Personal Data 3

Create a program that stores and reads out personal data using objects. The objects could for example contain variables named *name*, *age* and *height*.

- Define a class named *Person* and add variables to store personal data.
- In the *Person* class, add a method named *printSelfIntroduction* that prints out the data in a sentence.
- Create three *Person* objects and write data to them.
- Call the *printSelfIntroduction* method on each person object.

Lars is 24 years old and 187,5 cm tall.  
Bodil is 27 years old and 167,0 cm tall.  
Mikkel is 32 years old and 193,0 cm tall.
