Personal Identifier

Create a program that automatically gives new people new IDs.
- Create a new class named *Person* with variables for *name* (String) and *id* (int).
- Add a static *idCounter* (int).
- In the *Person* class constructor, increase *idCounter* by one and copy it to *id*.
- In the *Person* class, add a *toString* method that returns *name* combined with *id*.
- In the main method, test by create some people and printing them out.

```
Lars #1
Uffe #2
Alis #3
```
